Projects

Blog Website

Created a blog platform enabling users to create, edit, delete posts, and comment on others' blogs. Integrated secure user authentication, implemented CRUD operations using REST APIs, and utilized Celery for handling email notifications.

eCommerce website

Developed a user-friendly eCommerce platform with features like product listing, user authentication, shopping cart, and secure checkout. Designed a seamless user interface and implemented REST APIs for backend functionality.

Job Board Application

Building a platform connecting job seekers and employers with job postings, search filters, and application tracking. Implemented REST APIs for job management and optimized task processing using Celery for email notifications.
